OPINION OF VALUE

207,000

AS OF

1/2/2025

BY

Robert Joseph Ruark RJR Appraisals 22 Horizon Ridge Way, Apt 302 Garner, NC 27529 www.rjrappraisals.com PURPOSE OF APPRAISAL: The purpose of this appraisal is to determine an opinion of market value of the subject property. Uniform Standards of Appraisal Practice defines market value as "a type of value, stated as an opinion, that presumes the transfer of a property (i.e., a right of ownership or a bundle of rights), as of a certain date, under specific conditions set forth of the term identified by the appraiser as applicable in an appraisal".

SCOPE OF WORK: The scope of work is the process by which the appraiser obtains and organizes data pertinent to the subject property for the purpose of determining an opinion of its market value. The scope of work involves the application of the Cost, Income, and Sales Comparison Approaches (if applicable) in determining the final opinion of market value.

ASSUMPTIONS OF APPRAISAL: It is assumed that all required permits for any improvements to the property were obtained and that all codes have been met. The opinion of market value could be affected if proper permits were not obtained and/or codes were not met. It is assumed that all wells and/or septic tanks located on the property are in proper working order unless otherwise stated. It is assumed that all plumbing, electrical wiring, heating/air conditioning units, and appliances are in proper working order unless otherwise stated. It is assumed that termite infestation and soil conditions based on visual inspection by the appraiser have no negative effect on value unless otherwise stated. It is assumed that visual inspection of any improvements on the property reflects their true structural condition. It is possible that tests and inspections made by a qualified exterminator, soil expert, and qualified structural engineer/home inspector could reveal the existence of detrimental conditions on or around the property which could have an effect on the opinion of the subject's market value.

FLOOD ZONE: The appraiser's opinion is based on inspection of the property and available HUD flood maps. Final determination is reserved pending findings contained in an updated surveyor's report.

ENVIRONMENTAL DISCLAIMER: The value estimate is based on the assumption that the property is not negatively affected by the existence of hazardous substances (including but not limited to mold and asbestos) or detrimental conditions unless otherwise stated. The appraiser is not an expert in the identification of hazardous substances or detrimental environmental conditions. The appraiser's inspection and inquiries about the property did not develop any information that indicated apparent significant hazardous substances or detrimental conditions which would affect the property negatively unless otherwise stated. It is possible that tests and inspections made by a qualified expert could reveal the existence of hazardous substances or detrimental conditions on or around the property that could have an effect on the opinion of the subject's market value.

SURVEY: Statements concerning easements, encroachments, and lot sizes are based on visual inspection of the property and information obtained from the county tax assessor's office. It is recommended that an updated survey on the subject property be completed. The appraised value could be affected if an updated survey indicates that easements or encroachments exist and/or the lot dimensions and size are different from that shown in this report.

HOME INSPECTION: It is recommended that a home inspection be completed on any structures situated on the property. The appraised value could be affected if any detrimental conditions are noted in the home inspection.

TESTIMONY/COURT APPEARANCE: In the event that testimony and/or court appearance (including preparation and travel time) is required in connection with this report, the appraiser's fee will be \$100.00 per hour.

Appraiser:	Robert Joseph Ruark	Address: 22 Horizon Ridge Way, Apt 302, Garn	er, NC 275	29

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- The appraiser may have provided a sketch in the appraisal report to show approximate dimensions of the improvements, and any such sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size. Unless otherwise indicated, a Land Survey was not performed.
- If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- If the cost approach is included in this appraisal, the appraiser has estimated the value of the land in the cost approach at its highest and best use, and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used. Unless otherwise specifically indicated, the cost approach value is not an insurance value, and should not be used as such.
- The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of
- The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.
- If this appraisal is indicated as subject to satisfactory completion, repairs, or alterations, the appraiser has based his or her appraisal report and valuation conclusion on the assumption that completion of the improvements will be performed in a workmanlike manner.
- · An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment.
- The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database.
- An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser performs a non-invasive visual inventory that is not intended to reveal defects or detrimental conditions that are not readily apparent. The presence of such conditions or defects could adversely affect the appraiser's opinion of value. Clients with concerns about such potential negative factors are encouraged to engage the appropriate type of expert to investigate.

The Scope of Work is the type and extent of research and analyses performed in an appraisal assignment that is required to produce credible assignment results, given the nature of the appraisal problem, the specific requirements of the intended user(s) and the intended use of the appraisal report. Reliance upon this report, regardless of how acquired, by any party or for any use, other than those specified in this report by the Appraiser, is prohibited. The Opinion of Value that is the conclusion of this report is credible only within the context of the Scope of Work, Effective Date, the Date of Report, the Intended User(s), the Intended Use, the stated Assumptions and Limiting Conditions, any Hypothetical Conditions and/or Extraordinary Assumptions, and the Type of Value, as defined herein. The appraiser, appraisal firm, and related parties assume no obligation, liability, or accountability, and will not be responsible for any unauthorized use of this report or its conclusions.

APPRAISER'S CERTIFICATION

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The credibility of this report, for the stated use by the stated user(s), of the reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- Unless otherwise indicated, I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction

in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.
- I did not base, either partially or completely, my analysis and/or the opinion of value in the appraisal report on the race, color, religion, sex, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property, or of the present owners or occupants of the properties in the vicinity of the subject property.
- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.
- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification.

DEFINITION OF MARKET VALUE *:

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus.

Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. Buyer and seller are typically motivated;
- 2. Both parties are well informed or well advised and acting in what they consider their own best interests:
- 3. A reasonable time is allowed for exposure in the open market;
- 4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
- This definition is from regulations published by federal regulatory agencies pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 between July 5, 1990, and August 24, 1990, by the Federal Reserve System (FRS), National Credit Union Administration (NCUA), Federal Deposit Insurance Corporation (FDIC), the Office of Thrift Supervision (OTS), and the Office of Comptroller of the Currency (OCC). This definition is also referenced in regulations jointly published by the OCC, OTS, FRS, and FDIC on June 7, 1994, and in the Interagency Appraisal and Evaluation Guidelines, dated October 27, 1994.

Supplemental Addendum

File No. 01-02-25 State County Johnston NC Zip Code 27504

INTENDED USE - This appraisal is intended to be used by the client/intended user in determining the opinion of market value of the subject property.

PRIOR SERVICES - The appraiser has performed no other services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

HIGHEST AND BEST USE - The subject is a legally permissible use based on its current zoning. The lot size, shape, and land-to-building ratio allow the present structure and indicate a good utilization of the improvements. Based on current market conditions, the existing structure as a single family residence is its financially feasible and maximally productive use. The highest and best use, as if vacant, would be to construct a single family residence.

COMPARABLE PARAMETERS - An analysis of the market indicates that the majority of properties in the subject's area which are similar to the subject in age and gross living area and which sold within the past twelve months had been completely renovated and updated prior to their most recent sales. These properties are not considered by the appraiser to be true indicators of the subject property's market value due to the significant differences in condition. Therefore, the appraiser's comparable search parameters consisted of older homes which were located within a two mile radius of the subject, sold within the past eighteen months, contained between 1,800 and 2,900 square feet of gross living area, and were not recently renovated and updated. It should be noted that some line items in the comparable sales grid may not be bracketed and/or "across the board" adjustments may have been made. However, the comparable sales located in this report are the best available indicators of the subject's value known to the appraiser and expanding the parameters simply for the purpose of including additional properties which bracket the other line items would be unnecessary and misleading to the reader of this report.

SALES CONCESSIONS - Comparable 1 is adjusted as the seller paid a portion of the buyer's closing costs.

DATE OF SALE/TIME - Comparable 3, although over one year, is one of the best available indicators of value known to the appraiser. No date of sale or time adjustment is necessary for Comparable 3.

SITE - The comparables are adjusted for their lot sizes.

QUALITY OF CONSTRUCTION - Comparables 2 and 3 have brick veneer siding and are adjusted for the differences in quality of construction.

AGE - Comparable 3 is adjusted for its age.

CONDITION - There are holes in the ceilings of the front sun porch and the front right side bedroom. There is also a portion of the ceiling of the rear sun porch which is sagging. These damaged areas appear to be from water leaks and need to be repaired. It is recommended that an inspection be performed on these areas by a qualified contractor to determine if significant damage to these areas exists. Therefore, this appraisal is being made with the extraordinary assumption that no significant damage to these areas exists. If it is determined that significant damage exists, the appraiser's opinion of the market value of the subject property could be affected. Comparable 1's heating/cooling unit was replaced in 2021. Comparable 2 has new luxury vinyl floors, a new heating/cooling unit, and a new water heater. Comparable 3 has no new updates. The comparables are adjusted for the differences in condition.

BEDROOMS - Comparables 1 and 2 are adjusted for their bedroom counts.

BATHROOMS - Comparable 2 is adjusted for its bathroom count.

GROSS LIVING AREA - Per Fannie Mae requirements, the subject was measured in accordance with the Square Footage Method for Calculating Square Footage ANSI Z765-2021. The subject was measured to the nearest inch or tenth of a foot and the final square footage was reported to the nearest foot, consistent with the definitions of above grade and below grade areas. A \$40 per square foot adjustment is made to Comparables 1 and 2 for size differences. No adjustment is necessary for Comparable 3.

GARAGE/CARPORT - Comparable 2 has an attached carport. Comparable 3 has an attached carport and a detached car shelter. The comparables are adjusted for the differences in amenities.

PORCHES/PATIOS/DECKS - The comparables are adjusted for the differences in amenities.

FIREPLACE - The comparables are adjusted for their fireplace/wood stoves.

OTHER AMENITIES - Comparables 2 and 3 are adjusted for the differences in amenities.

RECONCILIATION/APPROACHES TO VALUE - There are insufficient rental sales of properties similar to the subject in the subject's area to develop a gross rent multiplier. The subject is located in an area which is experiencing significant growth due to its proximity to the Raleigh, Durham, and Chapel Hill areas of North Carolina. An analysis of sales of properties similar to the subject in these areas over the past few years indicates that the sales comparison approach to value often exceeds the cost approach to value due to their locations. Therefore, it is the appraiser's opinion that the final determination of the opinion of market value of the subject property should be based on the sales comparison approach only and that the cost approach and income approach are not applicable.
